SPECIALTY ARC RATED SERIES

Youngstown's Arc-Rated series is a ground breaking line of advanced hand protection designed for utility workers. Most of this line is made up of very unique leather gloves where we used our modern ergonomic glove patterns and applied them to extra high quality leathers. We have expanded this offering of technical leather gloves to include items with additional protection such as flame resistance, cut resistance and our waterproof / windproof protection. The 2015 line now features 2 synthetic items, our new **FR 4000** and our **FR Emergency Gas Glove.** Both gloves are no drip / no melt and designed to withstand heat and flames while also providing cut protection and comfort. The result is increased dexterity, comfort, productivity and safety for workers.

Arc Flash 27 Cal

27 CAL GROUND GLOVE

Heavy duty, arc-rated goat grain work glove designed for superior dexterity, durability and comfort. Features double-layered leather in all the critical wear areas to enhance durability and protection. Arc-Rated to 27 cal/cm². Outlasts traditional work / driver gloves in multiples, resulting in annual cost savings and greatly reduced wastage, handling and operations.

FEATURES AND BENEFITS

- Arc-Rating: 27 cal/cm2 – ASTM F2675 / F2675M-13
- Ergonomic, 3D pre-curved performance glove pattern for excellent dexterity and comfort
- Double layering at palm, saddle, knuckles and fingertips enhances durability and protection
- 18oz/yd² high quality goat grain leather
- In compliance with the NFPA 70e - 2015 standard and updated OSHA standards for 29 CFR Part 1926

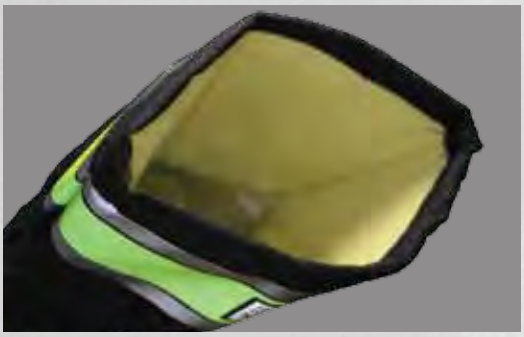
FR EMERGENCY GAS GLOVE

FR Palm made with Schoeller®



Inner Layer

The world's first protective, flame and heat-resistant glove designed specifically for emergency gas operations. The glove is made of the world's finest FR fabrics and features an extended 7" x 8" gauntlet cuff that easily fits over FR coverall sleeves to ensure total hand, wrist and forearm safety. This groundbreaking new glove is flame resistant, heat resistant, cut-resistant, anti-static, high visibility and won't shrink during flame exposure. If you or your workers need to put on full FR suits or coveralls, shouldn't your hands be equally protected? After all, it is your hands that are doing the work!

FEATURES AND BENEFITS

- Flame-Resistant – ASTM D6413 & Level 4 according to EN 407.1
- Anti-Static – EN 1149
- Contact Heat: Palm withstands 482º F for 15 seconds without causing pain or 2nd Degree burn (EN 407.2)
- Convective Heat: Interior of glove withstands heat from a 2,000º F flame for 18 seconds before a 2nd degree burn would occur (EN 407.3)
- Radiant Heat – Interior of glove withstands radiant heat of 572º F for 96 seconds before a 2nd degree burn would occur (EN 407.4)
- Arc-Rating: 28 cal/cm^2 – ASTM F2675 / F2675M-13
- Less than 2% shrinkage after 4 seconds of being fully engulfed in a 2 cal/cm^2 flame
- Outer shell made of FR Nomex® IIIa by DuPont™
- Palm is made of FR Schoeller® Works for heat, flame and abrasion resistance
- Thermal layer of FR Nomex® for added thermal protection against heat and flame
- Innermost liner made of 100% Kevlar® fiber by DuPont™ is flame and cut resistant
- Reflective FR 3M Scotchlite™ used throughout the top and cuff for increased visibility and awareness
- 7" x 8" gauntlet cuff fits easily over FR coveralls and provides added wrist and forearm protection

PLUS SERIES

Youngstown's Plus Gloves are a perfect combination of quality, durability and value. Each ergonomic glove design is form-fit to the hand for superior comfort and dexterity. These gloves cover a wide variety of applications and working conditions.

I recently picked up a pair of Youngstown Gloves and have been wearing them at work for a few weeks. I am very impressed. Normally I have cuts in my gloves and the gloves are starting to rip. I have never had a pair of Gloves that are as comfortable as these. I would recommend these Youngstown Gloves to anyone that has not experienced them.

– Dan Schwarz

GENERAL UTILITY PLUS

EN388
3141

All-purpose and abrasion resistant, this is the ideal performance work glove. Features Youngstown's Signature non-slip palm reinforcement for increased durability and grip. A perfect combination of quality, comfort and durability.

FEATURES AND BENEFITS

- Directional top of hand wicks away heat and moisture
- Comfortable synthetic suede base layer
- Non-slip palm reinforcement enhances grip and durability
- Double stitched bonded nylon thread for extended life
- Terry cloth thumb for wiping away sweat and debris
- Supportive Neoprene cuff with adjustable
- Ergonomic, 3D performance glove pattern for excellent dexterity and comfort

WATERPROOF WINTER SERIES

Youngstown's Waterproof Winter Gloves offer great protection from winter weather without sacrificing dexterity or comfort. These models feature Youngstown's triple layer waterproof technology made of an insulating liner, waterproof membrane and form-fit outer shell. All of these models are built to withstand rugged work applications but they also offer dual functionality for use in winter recreation activities.

We have blizzard like conditions here in MN today 20+mph winds and so far we have gotten about 10-12 inches of snow. I wore them to snow blow the driveway and all I can say is WOW, these gloves are awesome!! It was so nice to have warm dry hands and they fit so nicely I barely noticed I had gloves on....I could even do the push button code pad on my garage door opener without taking them off. Really glad I bought 2 pair. I can't wait to use them for ice fishing and snowmobiling. GREAT PRODUCT!!!!

WATERPROOF WINTER PLUS

EN388 3332 EN511 1 2 1

Youngstown's original waterproof winter work glove. This was a first of its kind product when introduced in 2003 and it revolutionized the winter work glove market. It is the perfect combination of warmth, dexterity and durability and designed for all-purpose winter work. Features a form-fit, reinforced outer shell, 40g Thinsulate, waterproof / windproof membrane and a soft inner liner. Ideal for countless activities in cold, wet wintery conditions.

FEATURES AND BENEFITS

- 40g 3M Thinsulate provides lasting warmth
- Soft fleece liner against the hand for added warmth and comfort
- 100% Waterproof, windproof inner membrane keeps hands dry
- Durable and form-fit outer shell maintains dexterity
- Heavy duty non-slip palm reinforcement enhances grip and durability
- Internal knuckle protection on top of hand
- Terry cloth thumb for wiping away sweat and debris (or cold noses)

WATERPROOF WINTER XT

An insulated, waterproof winter work glove designed for abrasion resistance, warmth and comfort in harsh, wet wintery conditions. Features 200 grams of 3M Thinsulate™ for added warmth and a waterproof and windproof membrane to keep hands dry. The glove has an extended gauntlet cuff allowing the wearer to tuck his jacket sleeve under the cuff to lock out cold. Designed for winter work, but also works for winter recreation.

FEATURES AND BENEFITS

- 200g 3M Thinsulate keeps hands warm
- Soft fleece liner keeps hands warm
- 100% Waterproof, windproof inner membrane keeps hands dry
- Durable and form-fit outer shell maintains dexterity
- Heavy duty non-slip palm reinforcement enhances grip and durability
- Terry cloth thumb for wiping away sweat and debris (or cold noses)
- Extended gauntlet cuff

CUT-RESISTANT SERIES

Youngstown's Cut-Resistant Gloves are a unique line of performance work gloves which are completely lined throughout with Kevlar® fiber by DuPont™. Every inch of the glove – palm, top and even the sides of the fingers – is lined with Kevlar® fiber. The result is 360º protection against cuts along with significantly increased durability.

We have been using Youngstown's General Utility Lined with Kevlar® for over 2 years now and they have become a necessity to our operation. I have tried other gloves in the past and the team made me go back to Youngstown gloves.

– Brian Carlson
Dynamic Recycling

GENERAL UTILITY LINED WITH KEVLAR®

ANSI 3 CUT LEVEL

PUNCTURE ANSI 4

One of Youngstown's top selling styles and another Youngstown first to market when introduced in 2005. We took our top selling General Utility Plus model and lined every part of the glove with cut-resistant Kevlar® fiber by DuPont™. The result is an extra durable and ANSI Cut Level 3 work glove. The outer shell features heavy duty non-slip reinforcement, an adjustable cuff and a terry cloth thumb. This extra tough glove is ideal for a wide range of applications where durability, cut resistance and puncture resistance is a must.

FEATURES AND BENEFITS

- ANSI Cut Level 3
- ANSI Puncture Level 4
- Completely lined by a cut-resistant liner made with Kevlar® fiber by DuPont™
- Internal knuckle protection on top of hand
- Comfortable synthetic suede base layer
- Heavy duty non-slip palm reinforcement enhances grip and durability
- Terry cloth thumb for wiping away sweat and debris
- Supportive cuff with adjustable Velcro closure

ANSI 3 CUT LEVEL

SAFETY LIME LINED WITH KEVLAR®

A cut resistant, high visibility performance work glove. The entire interior of the glove is lined with cut-resistant Kevlar® fiber by DuPont™. The outer shell is very form-fit and features reflective 3M Scotchlite™ on the knuckle and wrist for enhanced visibility. This ultra safe glove rates an ASNI Cut Level 3 and offers an excellent combination of durability, dexterity and overall protection.

FEATURES AND BENEFITS

- ANSI Cut Level 3
- Completely lined by a cut-resistant liner made with Kevlar® fiber by DuPont™
- Reflective 3M Scotchlite promotes high visibility and increased safety awareness in lowlight conditions
- High visibility safety lime stretch nylon on back of hand
- Heavy duty non-slip palm reinforcement enhances grip and durability
- Terry cloth thumb for wiping away sweat and debris
- Supportive cuff with adjustable Velcro closure
